PERU

REGIONAL PROFILE

This brief regional profile provides facts and figures that illustrate local conditions and challenges for English language education. Education spending refers to the percentage of total government expenditure dedicated to education. Internet penetration is the percentage of people in the region with access to the Internet.

ENGLISH AND EARNING POWER

The EF EPI has consistently found correlations between English ability and earning power, quality of life, innovation, and a range of other social and economic indicators. This correlation graph shows a positive relationship between regions’ English proficiency and their average gross income.

WORKING SMARTER

For economies around the world, higher English proficiency comes with significant benefits. English proficiency is positively correlated to productivity as measured by the amount of work produced for each hour of labor.
